

Subtraction strategy

$$\underline{74} - 47 = 27$$

dizaines	unités
	
2	7

I can't take 7 'ones' when there are only 4 so I need to exchange a 'ten' for 10 'ones'

Now that I have 14 'ones' I can take away 7 of them and then take away the 4 'tens' and count what is left.
